

## APPLICATION

The Stopfor™ MSP 150kg is a sliding fall arrester of new generation. When used as a fall arrester, it can be used with 14mm diameter **stranded** rope.

The Stopfor™ MSP 150kg is a new fall arrest concept. Unlike fall arresters implementing a jaw as locking system, the Stopfor™ MSP 150kg eliminates the risk of mechanical blocking. Blocking is ensured by the body when an abrupt change of position occurs. For this reason, the unit is more ergonomic and compact than its competitors and slides easier on the rope with no excessive locking. The unit can be opened to allow the user to perform maintenance on the product with no need to disassemble the fall arrest. The Stopfor™ MSP 150kg is equipped of an anti-reversible system and a park function.

## TECHNICAL CHARACTERISTICS

- Material : steel yellow zinc
- Steel connector M10 + Lanyard PE 30cm + 1 M41 steel
- Designed for use with Tractel® polyamide stranded rope 14mm diameter, sold separately
- Bare weight : 360g

	Stranded rope 14 mm	Anti reversibility system	Park function	Aluminium flange	150 kg	Vertical use	Horizontal use

## DESCRIPTION

The Stopfor™ MSP 150kg fall arrester is made of steel.

This light weight, robust, ergonomic and compact device connects to all the fall arrest anchoring points on the harness. It can be connected to the latter using a small 30cm lanyard.

The rope is easy and fast to set up. To do so, the user removes the connector, swivels the two side plates and positions the rope. To close the unit, the user simply pivots the two side plates in the opposite direction and reinstalls the connector which acts as a safety lock.
